

Pre-application Public Consultation

Proposed planning application for a solar farm with associated energy storage on Land at Middle Road Farm, Middle Road, Harbury, Warwickshire.

Pegasus Group would like to announce the start of the public consultation for the “Middle Road Farm Solar Farm”, a 49.9MW solar energy project with associated battery energy storage for which we are preparing the submission of a planning application on behalf of the developers, Novergy and Canadian Solar.

The proposal will provide clean and sustainable renewable energy for up to 15,000 households which will be essential to meeting the goals of the climate emergency declared by Stratford-on-Avon district council in the fight against climate change. Additionally, the proposal will promote biodiversity and wildlife, strengthen hedgerows, create jobs and provide funds for the local community.

An online pre-application public consultation is taking place between Monday 5th July and Monday 26th July 2021 to seek the views of the local community on the current proposals, which will be taken into consideration as the final application is produced.
